

Natalie Nitsche & Jan Van Bavel, ASA August 2016, Preliminary Findings

Her Education, His Education & Fertility: Exploring How Educational Pairings Affect Couples 2nd Birth Hazards

Hazard rates 2 nd births: Both highly educated versus she high he lower / he high she lower	Her income ratio (lag)	Joint family income (lag)	Division of housework (lag)	His egalitarian gender values	Conflicting gender values	Matched in fertility preferences (second wave)	Relationshi p Satisfaction (his and hers)	Sexual Satisfaction (his and hers)
<i>Base Model (Reduced N)</i>	N=561	N=561	N=998	N=1375	N=1249	N=961	N=1147s	N=803
Difference in hazard rate/coefficient size?	YES	YES	YES	YES	YES	YES	YES	YES
Significant?	NO	NO	NO	YES (bothh vs hhslower)	NO	NO	YES	YES (bothh vs shhslower)
<i>Modeling Mechanisms</i>								
Change in difference of hazard rates/coefficient differences?	NO	NO	NO	NO	NO	NO	NO	NO
Mechanism Variable Direction & Significance	- ***	NO	NO	+***	NO	NO	NO	-***

Only one item:
("women should put more effort into family then into career")
